

## CAPABILITY STATEMENT

Safe Transport of Dangerous Goods via UAV

### COMPANY OVERVIEW

Viking Drone Packaging (VDP) specializes in the safe transport of dangerous goods via drone. We support operators and logistics providers through integrated packaging, monitoring, and training solutions—enabling compliant, secure, and operational UAV transport. VDP bridges dangerous goods regulations with real-world drone deployment, advancing time-critical and high-consequence logistics.

**VIKING DRONE PACKAGING**  
The Annexe  
Goodwood Aerodrome  
Chichester PO18 0PH  
United Kingdom

SIC: 82920 - Packaging activities

**WORLD'S FIRST CERTIFIED CRASH  
PROTECTED CONTAINER (CPC)**

### DIFFERENTIATORS

- **World's First Certified Crash Protected Container (CPC)** supporting drone transport safety
- **Radiopharma-Focused Safety Approach** – Designed for high-consequence, time-sensitive payloads
- **Integrated End-to-End Support** – Packaging, monitoring, delivery systems, and training in one solution
- **DG + Drone Integration Expertise** – Bridging compliance with real-world UAV operations
- **Proven Engineering & Testing Support** – Backed by established packaging engineering and testing capabilities

### PAST PERFORMANCES

- Supported deployment of drone-based dangerous goods transport operations within regulated environments
- Advanced radiopharmaceutical transport via UAV in controlled conditions
- Validated high-impact protection through real-world drop testing of medical payload systems

### CORE COMPETENCIES

- Dangerous Goods Transport via Drone (Operational Enablement)
- Radiopharmaceutical Transport Support (Time-Critical Payloads)
- Vibration-Controlled Packaging for UAVs
- Temperature-Controlled Packaging (Cold Chain Assurance)
- Smart Packaging (GPS Tracking & Secure Access Control)
- Droppable Delivery Systems (Parachute & Controlled Descent)
- Regulatory Guidance & Operational Readiness Support

### TRAINING & COMPLIANCE SOLUTIONS

- CAA-Approved Dangerous Goods Training (tailored, global delivery)
- Computer-Based Training (CBT) with digital records & audit tracking
- UAV-Specific DG Handling & Loading Procedures
- Initial & Recurrent Training Programs for Operators & Shippers
